Our Production

Since its founding, Khilari has spent all of its time and energy on two things - producing 100% fruit juices cold pressed from locally sourced and non-GMO fruit - and supporting healthy lifestyles. All of our grapes, apples, peaches, and plums, as well as all of the other fruits and vegetables we use in our deliciously satisfying cold pressed juices, are sourced from Georgian orchards and farms in the pristine growing region of ShidaKartli. We will be sourcing also sweet oranges and mandarins from Guria and Adjara as well as flavor-packed carrots and berries from Samtskhe Javakheti and Imereti. Khilari fully employs 100% of local workforce - the Internally Displaced Persons (IDPs), who were affected and displaced during local conflicts. The company embraces socially responsible activities designed to improve the well-being of individuals working throughout the region.

Apple Juice

Georgian apples are famous for their intensely satisfying and slightly tart fruit flavor. Nutritionally rich, and naturally low in calories, the fruit harvested from Georgian orchards makes every bottle of Khilari Apple Juice undeniably delicious and thoroughly enjoyable.

Peach Juice

Intensely sweet, slightly tangy, and bursting with flavor, the natural juice we make from 100% locally harvested Georgian peaches is loaded with nutritional goodness, high in natural fiber, and incredibly satisfying. Without a doubt, Khilari Peach Juice is sunshine in a glass.

Orange Juice

Intensely sweet, slightly tangy, and bursting with flavor, the natural juice we make from 100% locally harvested Georgian oranges is loaded with nutritional goodness, high in natural fiber, and incredibly satisfying. Without a doubt, Khilari Orange Juice is sunshine in a glass.

Our Story

We believe in humans' positive future attitudes towards better healthy living through consuming organic and natural food

and drink products. That is why we decided on founding 'Khilari', which comes from Georgian word 'Khili', translating in English as a fruit. Choosing this very name is logical, as far as the 'Khili' is the only ingredient for our final products. Founded in 2017, Khilari is oriented at producing finest natural fruit juice products made from 100% locally grown, non-GMO fruits. Our fruit processing facility is equipped with European quality cold pressing machinery and is located in Gori region, which is regarded as a center for gathering fruits from different regions of Georgia.

Our passion is to make many people benefit their health from absolutely refreshing and delicious, 100% fruit juices of Georgia at local and international level.
